The Watershed Creative Prize serves to recognise and acknowledge the theme of Sustainability within our City of Salisbury Community.

The City of Salisbury is committed to Sustainability and has articulated its commitment in its City of Salisbury City Plan 2035, identifying the maintenance of a Sustainable City as one of its key pillars.

The plan's foundations are identified as:

- Salisbury has a balance of green spaces and natural environments that support biodiversity.
- We make the most of our resources including water, waste and energy.
- Our community, environment and infrastructure are adaptive to a changing climate.

What Is Sustainability?

Sustainability focuses on meeting the needs of the present without compromising the ability of future generations to meet their needs. The concept of sustainability is composed of three pillars: economic, environmental, and social - also known informally as profits, planet, and people.

The City Of Salisbury – Our Vision

Council's vision is to ensure Salisbury is a progressive, sustainable and connected community.

A sustainable Salisbury:

- *Protects and conserves our diverse natural environment to support biodiversity*
- *Ensures that we make the most of our resources and reduce Council's environmental footprint*
- *Enables our community, environment and infrastructure to be resilient to a changing climate.*
