

Golden Court, Paralowie

Option 1: Both sides of street

Large Fruited SA Blue Gum
Eucalyptus leucoxylon ssp. megalocarpa

An evergreen tree, up to 10m in height, with a dense, spreading canopy. It has prolific pink flowers that appear in late winter, spring and summer. It will tolerate a wide range of soil and climatic conditions. This tree is recommended for small verges and under powerlines, and is SA Water approved.
Local example: Teresa Court, Paralowie.

Option 2: Both sides of street

Kurrajong Bottle Tree
Brachychiton populneus

An evergreen tree, up to 12m height, with glossy, green foliage. Flowers are creamy-white with red centres and appear in spring. Woody seedpods grow in clusters. This tree will tolerate a wide range of soil and climatic conditions. It is recommended for medium verges and is approved by SA Water.
Local example: Evan Avenue, Salisbury.

Option 3: Both sides of street

Turkey Oak
Quercus cerris

An deciduous tree, 10-15m high at maturity. Slow to moderate growth rate and develops into a rounded, moderately dense, symmetrical spreading tree. The foliage turns yellow to gold in Autumn. Native to Southern Europe, the Turkey Oak is well suited to Adelaide's dry conditions.
