### Assumptions

Expense Indexation is capped at 3%, however, not applied unless stipulated in specified contractual arrangements.

Offsetting and related items within the report are marked by a letter such as [A], [B] etc.

Dog and Cat registration income is not changed and is based on the current fees, with a Standard registration fee of \$42.50 and a Non-Standard maximum registration fee of \$85.

CPI increase for the Property Management related income is based on the LGPI June 2023 Quarter increase of 6.9%.

### Risks

Legal expenditure - unpredictability around the occurrence of appeals and other legal action.

Capitalisation of staff in Strategic Development Projects - dependent on scope of property development works - For the 24/25 FY, it's increased based on the development of Walkleys Road Project.

Fines Enforcement Recovery Unit dependent on collection processes undertaken.

## SAMP: Plant & Fleet Replacement Program

**Id Number:** 34599

**Department:** City Infrastructure

**Key Direction:** Innovation and Business Development

Financial Year: 2025

Executive Summary:	Deliver plant and fleet replacement in alignment with the Fleet Asset Management Plan.
Scope:	The scope is to deliver a program for plant and fleet replacement in alignment with the Fleet Asset Management Plan.
	The 2024/25 replacement program total is \$3.1m which is \$290k increase for this year due to the quantum of items due for replacement and their current expected replacement value. Noting that offsetting this cost is a forecast trade in value of \$801k.
	The proposed 2024/25 renewal program is made up of the following items:
	<ul> <li>Bus &amp; Van Qty 3 \$195k</li> <li>Chippers Qty 1 \$60k</li> <li>Light Trade Vehicles Qty 10 \$530k</li> <li>Light Passenger Vehicles Qty 6 \$265k</li> <li>Front Deck Mower Qty 1 \$50k</li> <li>Tractors Qty 1 \$110k</li> <li>Trailers Qty 4 \$50k</li> <li>Trucks Qty 6 \$1.8m</li> <li>Total \$3.1m</li> </ul>
	Note: Changes in categories for items may occur depending on current business requirements.
Justification:	This program and level of service has been developed in accordance with the endorsed Strategic Asset Management Plan (SAMP) adoption Resolution 0439/2023, August 2023.
	This bid is to create a program for major plant and fleet replacement based on the Asset Management Programs that have been developed.

PFN001206 - P a g e | 1 Date Produced: 05-Mar-2024 The provision and maintenance of Council's assets is an important component to the needs of the community and plant and fleet assets are directly linked to many of Council's objectives across a range of infrastructure projects and service delivery functions.

This program focuses on the needs challenges and risks attributed to the Plant & Fleet assets of the City of Salisbury.

# Plant Equipment for Removal of Seaweed from St Kilda Boat Channel

Id Number: 36333

**Department:** City Infrastructure

**Key Direction:** A welcoming and liveable City

Financial Year: 2025

Executive Summary:	Procurement of a push boat to remove seaweed from the St Kilda boat channel.
Scope:	A customised push-boat to be purchased for seaweed removal from the St. Kilda Channel at a cost of \$48k.
	The cost to procure a push boat with trailer to facilitate the removal of seaweed for the St Kilda boat channel is \$40k.
	Staff will be required to obtain a Coxswain's ticket and boat license to facilitate the operation of the push boat. The cost for training of staff will be \$8k.
	\$4k commencing year 2 for ongoing Maintenance and Consumables.
Justification:	Following undertaking a successful trial in 2023/24 as endorsed February 2023, Resolution 0125/2023, approval was given in February 2024, Resolution 0598/2024 to purchase a customised push-boat for seaweed removal. This will enable rapid deployment of seaweed removal from the channel as required by seasonal variations by Council staff.

**SAMP: CCTV Renewal Program** 

Renewal of CCTV equipment to ensure the continued success of the City of Salisbury Public Safety CCTV network due to the end of life of products

Id Number: 34603

**Department:** City Infrastructure

**Key Direction:** A welcoming and liveable City

installed in 2016/17 & 17/18.

Financial Year: 2025

**Executive Summary:** 

Scope:	Renewal of fixed CCTV network and associated infrastructure within the City which supports public safety and asset security. As this technology continues to change, with a renewal the equipment is upgraded to the latest standards of technology, however the scope of works excludes the installation of new CCTV devices at new locations.  Locations for 2024/25 will be identified upon further investigation and
	prioritisation of the End of Life and Asset Register.
Justification:	This program and level of service has been developed in accordance with the endorsed Strategic Asset Management Plan (SAMP) adoption Resolution 0439/2023, August 2023.
	The City of Salisbury has installed CCTV infrastructure around the City of Salisbury since 2015 to establish and provide the City of Salisbury with a public safety CCTV network, which has also been effective in assisting Police with crime management identification and investigation of offenders and crime prevention activities across the City of Salisbury. The network has been expanded in the years since inception and minor upgrades have assisted to strengthen and expand the network capability. The CCTV equipment has served the City of Salisbury well and original installed equipment is progressively reaching end of life at 6+ years of service life currently. Our ongoing SAMP replacement program instils continuation of a strong public safety network as well as continuing to manage our storage requirements to maintain at minimum Australian Standards with our CCTV network outcomes. Proposed budget will allow for renewal and upgrade to end of life CCTV cameras, network video recorders and minor wireless radio infrastructure equipment to ensure continued public safety network success for years to come. The new equipment must meet current evidentiary standards and should be networked for remote viewing and monitoring of system by both CoS Security and SAPOL which is a service that is currently in place and has been for quite some time.
	PFR001207 - Page   1

Technology advances which improve low light capturing and recording of quality images and inbuilt infrared technology with new available products allow for appropriate upgrade to these end of life products to continue improvements to our successful network of CCTV equipment. Without the funds provision to upgrade these end of life products, our public safety network will become complacent in ability and vigilance of public safety contribution.

## **Adelaide Coastal Councils Network**

**Id Number:** 34636

**Department:** City Infrastructure **Key Direction:** A sustainable City

**Financial Year:** 2025

Executive Summary:	To fund the annual membership fee for the Adelaide Coastal Councils Network.
Scope:	In accordance with Resolution 0441/2023, August 2023, approval was given for the inclusion of a new budget bid to fund the annual membership fee for the Adelaide Coastal Councils Network.
Justification:	As the network is currently developing the strategic plan we have sort membership, and consideration of ongoing membership will depend on the work agenda.

## **Thrive Action Plan 24-25**

Id Number: 36054

**Department:** Community Development **Key Direction:** A welcoming and liveable City

Financial Year: 2025

Executive Summary:	The Thrive Strategy outlines Council's contribution towards achieving improved outcomes in our community's health and wellbeing. Supporting the delivery of the Thrive Strategy, the Thrive Action Plan sets out a range of new initiatives directed at enhancing our community's wellbeing in each Thrive domain.
Scope:	To deliver the proposed programs ('opportunities') aligned to each of the Thrive domains, as listed in the Thrive Action Plan, and to conduct an evaluation process in partnership with a university.  In total, eleven actions are proposed in the Thrive Action Plan. These are listed below.
	Socially Connected domain: Action 1 - Our Places. This initiative is about supporting community members to bring their neighborhood-building projects to life. Action 2 - Skills sharing and the circular economy. For this initiative, we will work with two service clubs to establish two circular economy sharing initiatives (e.g. tool libraries, repair cafes, community gardens).
	Physically Active domain: Action 3 - Salisbury Fit Club. The delivery of a calendar of introductory group exercise and activity classes in public parks, targeting those experiencing barriers to getting active.  Action 4 – Little Para Activation. The development of a scoping study and activation plan for the Little Para Trail, identifying long and short-term infrastructure and safety priorities, recreation and commercialisation options.  Action 5 – Trail and Recreation Maps. This will involve developing an interactive web map showing trail paths, amenities, points of interest, etc.  Action 6 – Social and modified sports. Working with three clubs/sports as a pilot initiative, establish a calendar of social and modified sporting options (e.g. Walking Football).

### Culturally Enriched domain:

Action 7 – Salisbury's Story. This will involve the delivery of activities to gather and express Salisbury's inclusive living history in creative ways, physically and digitally.

## Civically Engaged domain:

Action 8 – Non-council volunteering. Working with industry stakeholders, we will promote the wellbeing benefits of volunteering to increase the volunteerism rate in our LGA.

### Learning & Aspiring domain:

Action 9 – Libraries Alive After Dark. A series of four literary and science themed events per year at the Salisbury Hub, targeting young people and their families.

Action 10 – BiblioTrek. We will design and deliver a nature-based learning program run through the libraries that supports and encourages self-guided learning in the outdoors.

### Safe & Secure domain:

Action 11 – Cost of Living Strategy. This will involve cross-organisational collaboration to develop a suite of actions that offers additional, meaningful support to community members dealing with the cost of living crisis.

### Justification:

The Thrive Strategy and Action Plan have been developed to deliver a step change in our community's health and wellbeing, in response to persistent and debilitating issues of social isolation, physical inactivity, and the resultant poor physical and mental health outcomes. Thrive aims to respond to the holistic wellbeing needs of our community members by supporting them to build their social connections, increase levels of physical activity, foster active citizenship and vibrant cultural expression, assist people on their self-development journeys, and support them to be safe and resilient through the cost-of-living crisis.

This budget bid is in response to Council resolution 0526/2023, That Council:

- 1. Approves the Thrive Strategy and proposed programs aligned to the Thrive Domains in the year 2023/24 as included in Attachment 1 (Item No 5.1.3, Community Wellbeing and Sport Committee, 21 November 2023).
- 2. Approves the Thrive Action Plan as included in Attachment 2 (Item No. 5.1.3, Community Wellbeing and Sport Committee, 21 November 2023).
- 3. Approves a non-discretionary budget review in the second quarter of 2023/24 for the budget of \$80,000 for FY23-24, with an additional \$160,000 as a non-discretionary budget bid of the 2024/25 Annual Budget Process.
- 4. Notes that the Administration will undertake a review of these programs at the conclusion of the 2023/34 and the 2024/25.

## **Strategic Land Review Feasibilities**

Id Number: 36058

**Department:** City Development

**Key Direction:** D3. CP2030 The Living City

Financial Year: 2025

Executive Summary:	Provides for the engagement of consultants to undertake the feasibility and business case investigations for the Strategic Land Review program.
Scope:	Strategic Development Projects are responsible for investigating strategic Council land across the City for suitability for delivery as a future residential development project this involves completion of site investigations and feasibility to test project merits through an initial high level feasibility and then detailed Business Case. This budget allocation provides a pool of funds to engage consultants as required to investigate sites suitability and constraints and to determine if suitable for future development for a rolling program that that will be delivered over 20 years. Once a project has been identified it will proceed through the community land revocation and project delivery as a separate bid with confirmed costing and revenue.
Justification:	Council owned land parcels determined as surplus to Council requirements as per the endorsed work plan for the Strategic Development Projects team.  This budget bid is for ongoing funding and should the program cease in future the funds will be returned to Council.

## **Climate Change Adaptation Plan**

**Id Number:** 36091

**Department:** City Development **Key Direction:** A sustainable City

Financial Year: 2025

Executive Summary:	Funding to enable development of a Climate Change Adaptation Action Plan which will build on findings of the climate change risk assessment and support implementation of actions in the Sustainability Strategy 2035 and City Plan 2035.
Scope:	A Climate Change Risk Assessment was completed in 2023 that identified high level physical and transitional climate risks to Council assets, operations and services. In November 2023, Council noted the initial findings of the risk assessment and that a report to Council on the climate change risk assessment that identifies and prioritises climate risks would be provided for its consideration in early 2024, with the next step being the development of a Climate Change Adaptation Plan to respond to priority climate risks in 2024/25 subject to Council's approval of funding [ESATS5 and 0525/2023].  The assessment recommended that a Climate Change Adaptation Action Plan be developed to determine action on priority risks (including high and very high risks). This process would consider the complexity and inter-relatedness of the risks by collectively planning for integrated risk treatments and strategically determine priority actions to progress, and by when.  The development of the Climate Change Adaptation Action Plan would be informed by analysis of geographical data, policy review, staff engagement, expert advice and financial modelling. Systems and tools to support implementation of the action plan would be identified.
Justification:	There were 44 high and 16 very high risks identified in the climate change risk assessment. This risk rating is residual so it accounts for current controls. This demonstrates that new controls and adaptation measures need to be implemented to effectively address these significant risks. Potential adaptation measures / risk controls were identified however further analysis and information is needed to prioritise actions and determine cost effective responses that reduce high and very high risks.

Effectively managing climate risks will help the Council ensure financial sustainability, minimise service disruptions, and improve community resilience. By prioritising and addressing climate risks Council will save money over the medium to long term. This is particularly true for longer lived assets, where investing more upfront to consider future climate conditions can safeguard assets long-term, and lower whole of lifecycle costs.

This bid addresses the following actions:

City Plan 2035, A sustainable City, Critical Actions Operational Focus:

Adopt practices and infrastructure that make the City cooler in an increasingly warm climate

Manage and plan assets so they are resilient to a changing climate.

Sustainability Strategy 2035, Climate Resilient Salisbury, New Actions:

Undertaking a Climate Change Risk Assessment to understand the corporate exposure to the physical, economic transition and liability risks associated with climate change

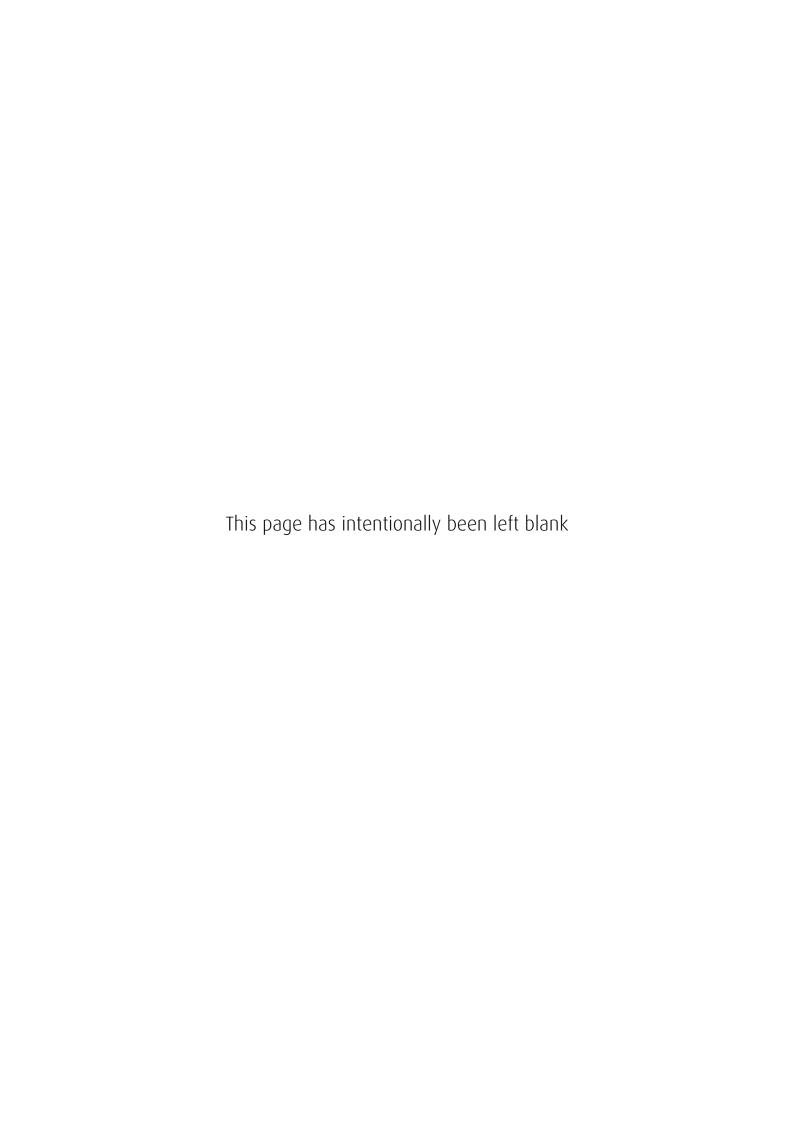

Incorporating climate change risk into asset management and financial planning.

## Planning Officer (1.0 FTE Level 5)

**Id Number:** 36097

**Department:** City Development

**Key Direction:** D4. CP2030 Achieving Excellence

Financial Year:	2025	
i illaliciai i cai.	2023	

	2023
Executive Summary:	An additional Planning Development Officer is sought to maintain service levels for the increased development activity in the Council. This additional cost will be offset by the increased planning application income that has been generated by the additional development activity, and which is now budgeted income from 2024/25.
Scope:	The cost of the additional FTE of \$126k will be offset by the increased budgeted income of \$170k from 2024/25.
Justification:	Council last reviewed the resources in the Development Services Division in 2020. At the time, Council allocated two additional FTEs into the division. These resources were deferred from a 2015 program review that anticipated resource savings proposed by the planning reforms, but which were not realised.
	Since that period, development activity has consistently grown. The growth has been monitored to evaluate whether this was short term or more sustained. The growth over the last four years appears to be sustained. The increased development activity is highlighted in income growth and value of development approval in the city.
	A comparative analysis with other councils has revealed that Salisbury Planning staff carry a higher workload than staff in other councils. Benchmarking shows that Salisbury is leading in the time frame in which planning consents are issued, despite the complexity of development applications being submitted (refer to the attached supporting report).
	Under the PDI Act, Council must make a decision on a development application within the prescribed statutory time period. Should the decision not be made within the prescribed time, the Act allows an applicant to serve a 'deemed consent notice' on Council, to obtain a 'deemed planning consent' for the development (i.e. to 'force' a consent to be granted).

Furthermore, customer service demands on the division have remained strong and require dedicated technical staff to be available for enquiries during business hours Monday to Friday (in person, over the phone and in written formats). This is an important service, highlighted in the diversity of the Salisbury community who often require assistance to navigate the now digitized planning system.

The above pressure points are considerable. To continue to manage the volume and complexity of development applications received, while achieving prescribed timeframes, Council may consider a reduction in customer service levels, however, current service levels are consistent with the Customer Service Framework and Charter.

Given this, it is recommended there is a further increase of 1 FTE in the division.

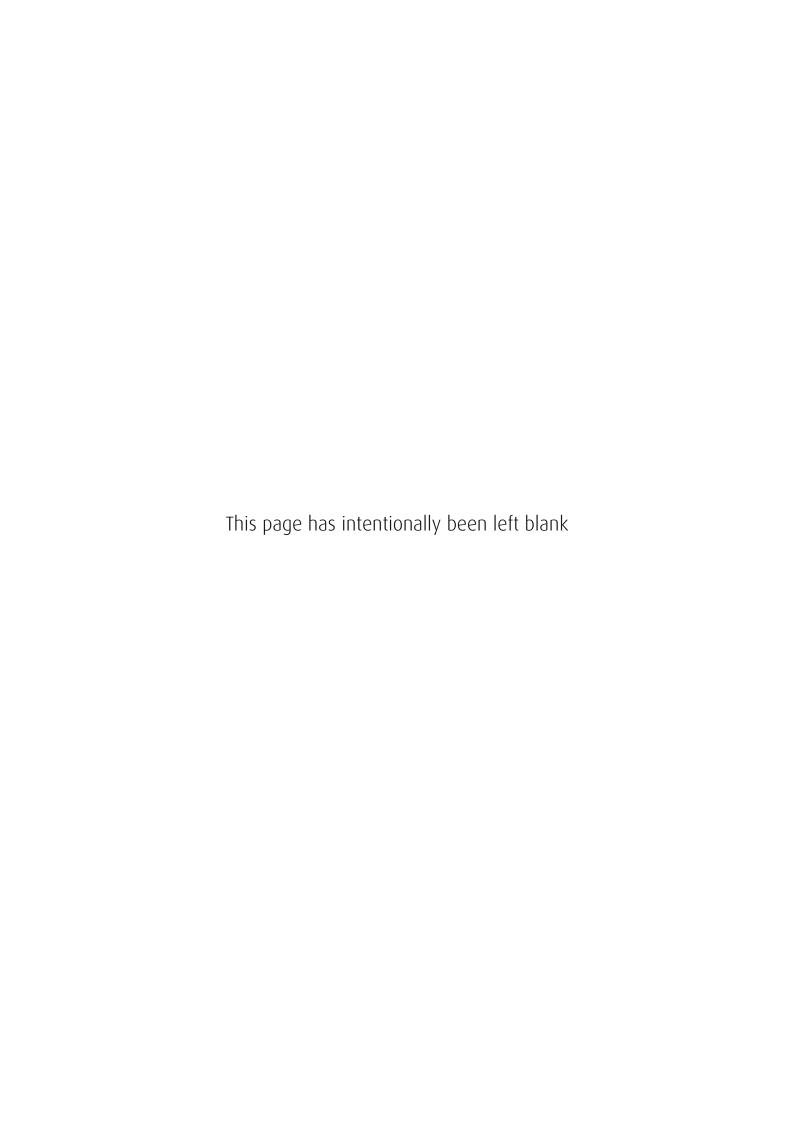

This resource increase will be offset by the increased income that has been generated by the additional workloads.

## Dog and Cat Subsidised Desexing 2024/25

**Id Number:** 36285

**Department:** City Development

**Key Direction:** Innovation and Business Development

Financial Year: 2025

### **Executive Summary:** All dogs and cats born after July 2018 are required to be desexed, unless the owner is a breeder. Subsidised, low cost desexing options are available eligible concession card holders, aiming to enhance compliance rates within the Salisbury community. This initiative can contribute to a decrease in unwanted litters and the number of impounded cats and dogs. The National Desexing Network (NDN) functions as a program that guides Scope: concession card holders to access discounted desexing services for their pets. Collaboratively, councils and participating veterinarians establish the cost for the desexing procedure. Pet owners can apply to the NDN for a discount voucher, which they can then use at a participating clinic. Owners are responsible for paying a discounted rate, usually around 50%, while the vet recoups the remaining agreed-upon fee from the council through the NDN. The NDN handles all administrative tasks, including issuing vouchers, reconciling payments, and facilitating communication between owners and veterinarians. Justification: All dogs and cats born after July 2018 are required, by the 'Dog and Cat Management Act', to be desexed unless the owner is a breeder. Subsidized low-cost desexing for eligible concession card holders can help increase compliance rates in the Salisbury community, especially for those unable to afford the procedure. Desexing is often costly, preventing some low-income owners on concessions from complying with the law, leaving them at risk of penalties and contributing to unwanted litters of dogs and cats. This exacerbates residents' issues and concerns and results in increased costs for managing stray cats in our community. Approximately 30% of all dogs and 16% of all known cats registered on Dogs and Cats Online (DACO) are non-desexed. About 36% of eligible dogs and cats are registered to concession card holders, indicating that around 400 cats and 2350 dogs could be eligible for the NDN-subsidized desexing. However, since cats registered on DACO only represent approximately 14% (3132) of the estimated owned cat population in Salisbury (approximately 22,000), there are

OPN001235 - Page | 1 Date Produced: 05-Mar-2024 an estimated additional 6790 cats eligible for the concession rebate.

Desexing cats is a key strategy to reduce unwanted litters and the number of cats handed into shelters from the City of Salisbury, with only a 2-3% reclaim rate from the 900-1,000 cats handed in annually. Funding preventative measures to reduce cat numbers through desexing will assist in reducing future potential demand and the impact on Council resources. Subsidized low-cost desexing was included as Action 7 in the Dog and Cat Management Plan 2022. Council registered with the NDN in 2022/2023 and allocated \$10,000 to participate in the subsidized desexing program, supported by a Dog and Cat Management Board subsidy of \$5,000. This support continued in 2023/24, with the DCMB announcing co-funding.

While DCMB funding has not been announced for 2024/2025, the success of the 2022/23 and 2023/24 programs, with \$10,000 expended by June 2022 and \$7,415 expended by December 2023, indicates the support for this program and encourages eligible persons to desex their pets.

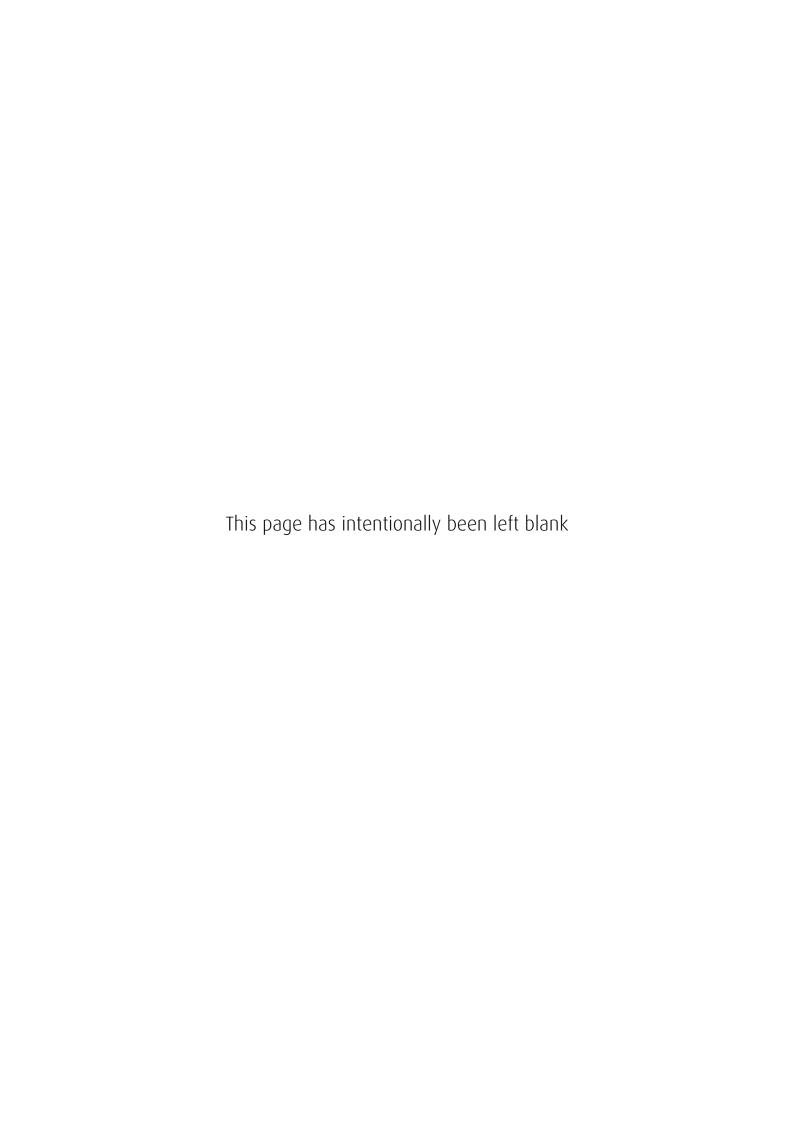

The support for this new initiative bid and ongoing subsidizations of desexing is subject to the ongoing provision of Dog and Cat Management Board funding.

## **Pooraka Pound Cleaning**

**Id Number:** 36289

**Department:** City Development

**Key Direction:** Innovation and Business Development

Financial Year: 2025

Local Government administers the Dog and Cat Management Act 1995 and has the responsibility for the seizure of dogs as specified under Section 60 of the Act. Once seized Council has a responsibility under Section 61(b) to detain the dog in a facility approved by the Dog and Cat Management Board for the ourpose of detaining dogs. The Pooraka Pound located at Research Road
Pooraka is the approved facility for the City of Salisbury and the City of Tea Tree Gully. The pound cleaning and welfare management of seized dogs is a requirement to ensure that Council complies with the Guideline for Council facilities used for the detention of dogs and cats under the Act, and the requirements under the Animal Welfare Act 1985, to prevent the ill treatment of animals.
The City of Salisbury and City of Tea Tree Gully joint use Pooraka Pound was opened for operations in early 2023 to facilitate the holding of impounded dogs for both Council areas and the final concept and design was based on nistorical demands and forecasted occupancy rates, based on ongoing service provision from shelters. The facility is built to provide a high welfare environment for impounded animals, providing state of the art pens for maximum comfort and hygiene, a climate-controlled environment, and the ability to isolate unwell dogs to reduce the risk to healthy dogs.  The welfare and hygiene of the environment is maintained through the ongoing and daily cleaning along with added services to manage the welfare of the dogs in long term holds.  The use of the pound starting in 2023, coincided with the Animal Welfare League (AWL) and RSPCA restricting their intake of dogs. Council's agreement with AWL was that after 72 hour hold, dogs were transferred to the AWL. The restrictions have required Council to increase the cleaning regime and
reference of the contraction of

of the previous facility and the cleaning contractors have had to modify their approach to manage the cleaning of the new pens and facility, and this has increased the time taken to clean as well as the costs.

The additional impact on cleaning costs is associated with the need to hold unclaimed dogs longer (in some cases several months) due to the lack of regular service from shelters. The long term holds mean higher occupancy rates and cleaning requirements and increased welfare management of dogs.

Increased welfare needs associated with holding dogs for long periods of time include:

- Walking and regular exercise this is very important for the dog's wellbeing and physical health, but helps alleviate stress and provides a positive outlet for their energy.
- Collaboration with local vets to provide assessments and treatment to injured or ill dogs to ensure their comfort and recovery and ensuring any treatments or medicines are administered correctly as well as worming and flea treatments for dogs held past the 72 hour mandatory hold period.
- Providing enrichment for the impounded dogs in addition to medical care toys and mental stimulation are crucial for the overall wellbeing and treats are provided as part of walking and cleaning and toys placed in pens.

All of these have added costs to the cleaning contract. In 2021/22 the expenditure on the old facility was \$40k, in 2022/23 the estimated budget was \$121k and due to late occupancy of new facility, expenditure was \$90k, and in 2023/24, the budget was \$121k, however the December YTD expenditure is \$98k, forecasting a total EOY expenditure of approximately \$200k, less 38% from CTTG (\$76k), resulting in a net bid of \$124K.

The cleaning component of the contract is in the order of \$121k and the welfare management component is in the order of \$79k.

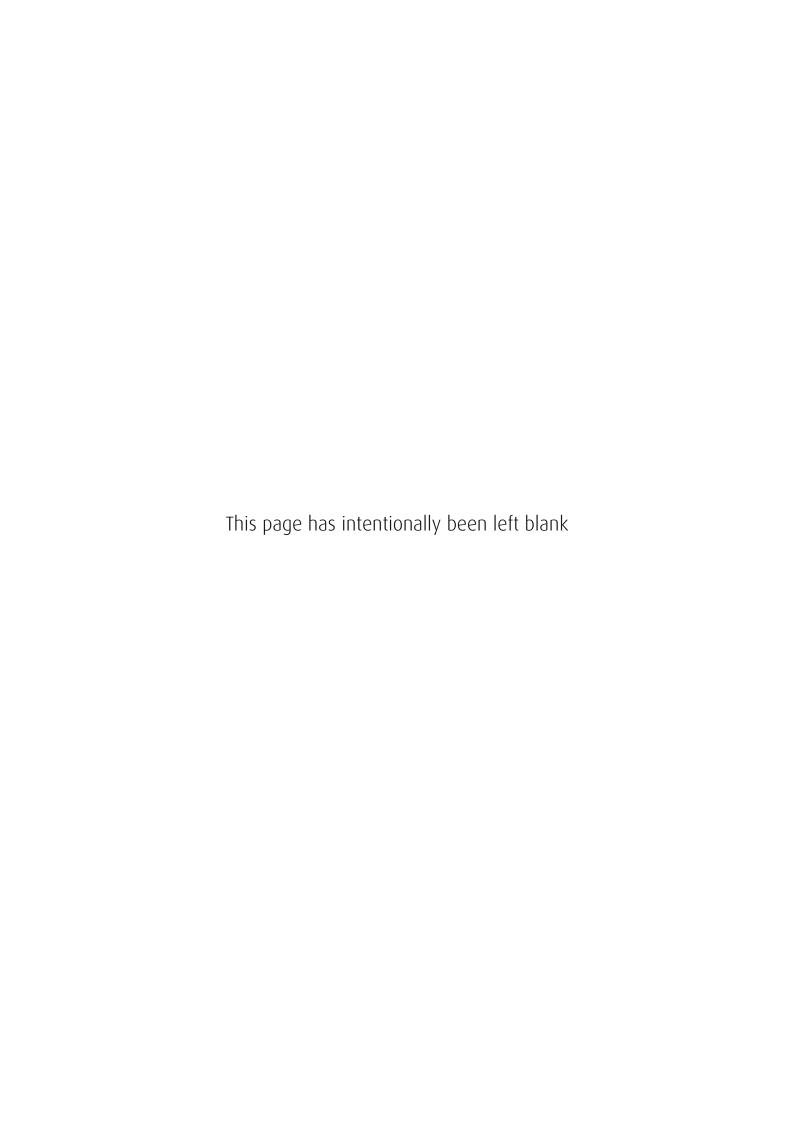

However the new initiative bid is subject to review and support by the City of Tea Tree Gully as per the Pooraka Pound Joint Use Agreement, to determine their acceptance of the cost's and changes. The co-contribution provision of 38% which was established for cleaning may vary based on impound rates and the welfare services provided for impound dogs as Salisbury has a higher occupancy and impound duration compared to CTTG. Consequently, it is likely that the \$79k would be a cost mainly borne by Salisbury.

## **Waste Management Strategy**

**Id Number:** 36298

**Department:** City Infrastructure **Key Direction:** A sustainable City

Financial Year:	2025		

Financial Year:	2025
Executive Summary:	Funding to enable development of a Waste Management Strategy in 2024/25 to support the Sustainability Strategy 2035. The strategy will be integrated into operations over subsequent years following the endorsement of the strategy.
Scope:	The development of a Waste Management Strategy would contribute to meeting the City Plan foundation to "make the most of our resources includingwaste", as well as achieving the objectives of the Resourceful Salisbury theme outlined in the Sustainability Strategy 2035:  • To reduce consumption, avoid waste and improve resource recovery in Council operations  • To support the community to improve resource recovery through community education and service delivery  • To support the development of a circular economy through Council initiatives and partnerships  The Waste Management Strategy will consider current operations, services and initiatives, as well as Council's partnership with the Northern Adelaide Waste Management Authority (NAWMA) and set out a pathway for making the most of our waste resources.  The strategy will incorporate new actions identified within the Sustainability Strategy 2035 including: implementing waste, recycling and organics bin systems in Council facilities supported by education and resources; applying the waste hierarchy to Council operations, services, events and facilities; and developing a Resource Recovery Action Plan to reduce waste and increase diversion from landfill.  The Waste Management Strategy will inform the development of policies regarding the waste hierarchy and the integration of recycled materials into projects and procurement, to ensure the organisation continues to move forward in this area.

Preparation of a Waste Management Strategy will enable Council to advocate to State and Federal Governments regarding waste management issues, including collaborative research opportunities to build a circular economy. These opportunities, as well as investigations into alternate waste management systems, may also be developed in partnership with NAWMA.

The Waste Management Strategy would be informed by:

- Waste audits of kerbside services (undertaken by NAWMA) and council facilities (to be undertaken by consultant) to inform opportunities for improvements.
- Review of South Australian and interstate examples of council resource recovery initiatives to identify options, models of delivery and learnings.
- Financial modelling and budget development for implementation.
- Engagement with NAWMA, Green Industries SA and other relevant key stakeholders.
- Market or technology opportunities as they arise locally.

The Waste Management Strategy would be developed in 2024/25 with potential key actions completed over the following years. Budget bids for financial years beyond 2024/25 will be prepared once the strategy has been endorsed.

#### Justification:

Community feedback on the Draft Sustainability Strategy in April-May 2023 showed the highest level of agreement on the Resourceful Salisbury theme objectives and actions and "reducing waste" was ranked as the highest concern for addressing environmental sustainability. This reveals there is good community support for taking further action on waste.

There are policies and targets in place at a state and national level to increase diversion of waste from landfill and achieve a circular economy. The South Australian Government target for diversion of kerbside waste from landfill is 70% by 2025.

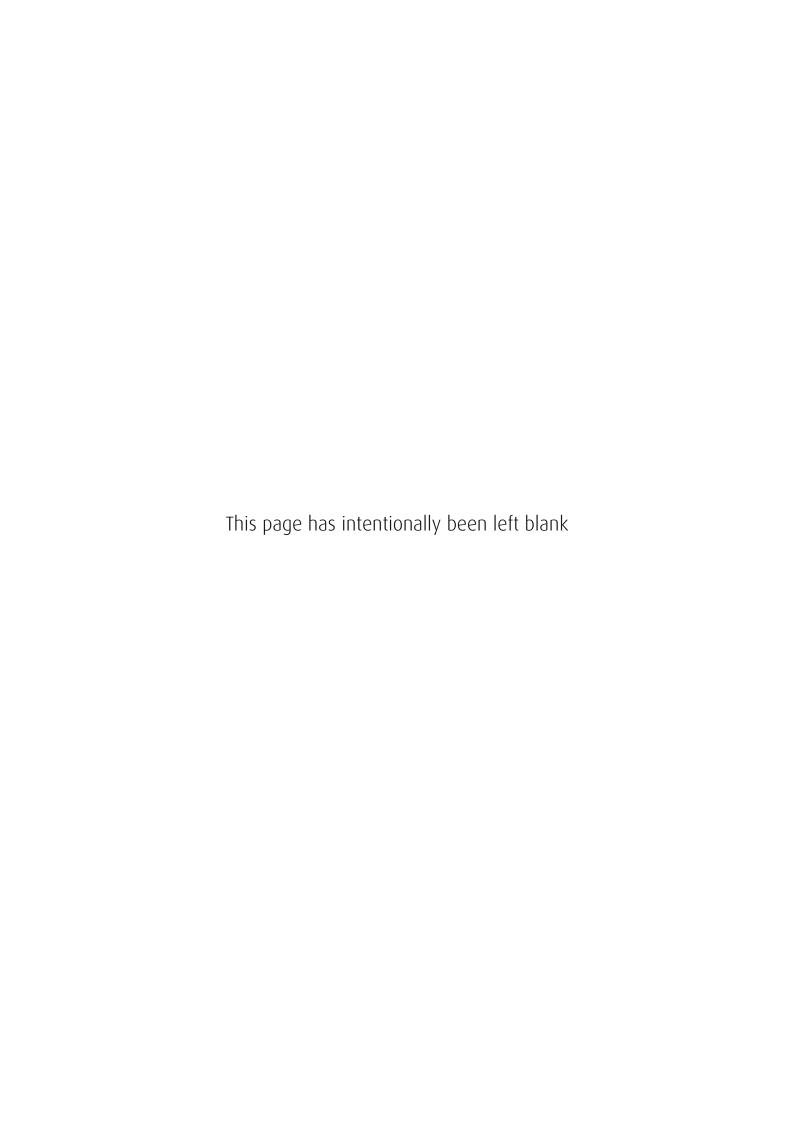

There are opportunities to improve resource recovery and circular economy across council operations and services. The CoS diversion rate for kerbside waste into recycling and FOGO bins in 2022/23 was 50.5%. However, the recycling stream has a high contamination rate so 30% of the recycling stream is disposed of as waste. The diversion rate has improved with the roll out of FOGO bins over the last couple of years, but next steps to increase the diversion rate further and support the community with resource recovery need to be determined.

# CONFIDENTIAL: Bridgestone Operating Model

Id Number: 36303

**Department:** Community Development **Key Direction:** A welcoming and liveable City

Financial Year: 2025

Executive Summary:	This bid seeks funding to continue the delivery of services at the Bridgestone Athletics Centre. Bridgestone Athletics Centre has been managed by a Coordinator role since the opening of the Centre. This temporary contract is now coming to a close (at end of FY 2023/24) so an alternative management model is being developed.
Scope:	Bridgestone Athletics Centre has been managed by a Coordinator role since the opening of the Centre. This temporary contract is now coming to a close (at end of FY 2023/24) so an alternative management model is being developed. Options for the new management model are currently being explored with the likelihood that a specialist recreation provider will step in and manage the centre under contract. The contract is likely to require a management fee or subsidy to be paid into the centre for the management services.
	Please note this is a holding bid with a further report to Council in April regarding the future operations of Bridgestone Athletics Centre.
Justification:	The Bridgestone Athletics Centre has proven a popular venue with schools for their athletics carnivals and has also hosted regional events (e.g. SAPSASA carnivals). This type of activation represents the majority of activity at the centre so it remains an important service.

# CONFIDENTIAL: Mausoleum Operating Model

Id Number: 36308

**Department:** Community Development **Key Direction:** A welcoming and liveable City

Financial Year: 2025

Executive Summary:	Funds required for operation of the Salisbury Mausoleum.
Scope:	In September 2023, City of Salisbury assumed management responsibilities for the Mausoleum at the Salisbury Memorial Park. This includes the sale of the crypts, coordination of entombments, memorialisation, general cleaning and maintenance. These funds underpin the service provision at the Salisbury Mausoleum.
	Please note this is a holding bid with a further report to Council regarding the future operations of the Mausoleum.
Justification:	The Salisbury Mausoleum is an important community service with more than half of the crypts in the facility already held under licence. The services and the mausoleum in general are very important to the licence holders and the nature of the facility requires it to be maintained to a very high standard. A procurement process for a suitable operator for the Mausoleum facility will be commencing in the near future, however, the timing of this process necessitates maintaining the budget at its current state. It should be noted that asset renewal and liabilities of holding the Mausoleum facility are not reflected in this bid.

# CONFIDENTIAL: Salisbury Recreation Precinct Operations

Id Number: 36312

**Department:** Community Development **Key Direction:** A welcoming and liveable City

Financial Year: 2025

Executive Summary:	To provide funding for the operations and maintenance required for the newly redeveloped Salisbury Recreation Precinct.
Scope:	The Salisbury Aquatic Centre represents the City of Salisbury's second largest capital project and replaces the City's previous Aquatic Centre at Happy Home Reserve. This bid is to provide the ongoing operational budget required for the management of the Centre and surrounding Precinct.
Justification:	STRATEGY LINK: City Plan 2035: A welcoming and liveable City  SERVICE CONTINUITY: With the completion of the Salisbury Aquatic Centre, this will provide a service to an agreed increased level of service for the community.

## **Waste Management for Events**

Id Number: 36316

**Department:** Community Development

**Key Direction:** A sustainable City

Financial Year: 2025

Executive Summary:	Provision of a Waste Management System that aligns with the City's sustainability goals at major events.
Scope:	The Sustainability Strategy 2035, adopted by Council in June 2023 includes objectives to reduce consumption, avoid waste and improve resource recovery in Council operations and also to support the community to improve resource recovery through education and service delivery. The City of Salisbury's commitment to sustainable management practices can be improved through improvements to waste management at larger events held throughout the city. Administration will engage the services of a specialist waste management contractor to provide a three-bin service at the following events in 2024/25:  - Australia Day  - Salisbury Fringe Carnival  - Christmas Carols  - Lights at Mawson  - 2 x Community Fun Days
Justification:	Adoption of contemporary waste management practices are integral part of demonstrating Council's commitment to sustainability and fulfilling the following resolutions;  At its meeting on 28 August, 2023, it was resolved that Council:  1.1.1 Demonstrates responsible waste management practices at its own major events.  1.1.2 Encourages those organising major events in Council event spaces, reserves and facilities, including hirers, to:  • Make an effort to avoid waste by reducing the number of unnecessary items brought to the event and the amount of waste created during the event  • Incorporate a food organics recycling stream  • Have a comprehensive waste bin system for the public and vendors  • Use clear and effective waste management signage  • Provide recycling bins, food organics waste bins as well as landfill bins, as part of its event waste management, to maximise recycling and reduce waste to landfill.

Date Produced: 05-Mar-2024

- 1.1.3 Requests the Administration to provide the event space hirers with the Waste and Recycling at Events and Venues Guidelines issued by the State Government.
- 1.1.4 Requests the Administration to present a report to the Policy and Planning Committee on event waste management.
  Resolution Number 0458/2023

From December 2023;

That Council:

- 1. Approves:
- a. The Administration to undertaking a procurement process to source a waste management contractor whose services reflect the State Government's 'Waste and Recycling at Events and Venues Guidelines' principles and deliver a three-bin solution to meet the current participation levels of Council's six larger events.
- b. The Administration providing the State Government's 'Waste and Recycling at Events and Venues Guidelines' to all future service providers at Council events.
- c. The Administration providing the State Government's 'Waste and Recycling at Events and Venues Guidelines' to all future casual hirers who intend to deliver a major event and encouraging them to transition towards adherence to the Guidelines over time, noting that all costs associated are at the expense of the event organiser.
- 2. Approves the engagement of a service provider up to the value of \$30k.
- 3. Approves a non-discretionary \$30k Second Quarter Budget Review in 2023/24.

Resolution Number 0550/2023

# Twelve25 Youth Employment and Work Ready project

**Id Number:** 36331

**Department:** Community Development

**Key Direction:** D1. CP2030 The Prosperous City

Financial Year: 2025

Executive Summary:	A youth specific (12 - 25 years) workforce and employment skills program.
Scope:	Program includes; - access to subsidised (75%) qualifications for young people (RSA, White Card, First Aid, Barista course) - small industry specific initiatives that support employment futures for young people (STEM expos, industry visits and open days)
Justification:	- Builds on the success of the previous "Twelve25 Youth Programs – Business Start Ups & Qualifications" which ends 30 June 2024 - In June 2023, Council have endorsed "Educational Engagement and Successful Transitions" as one of the three priority areas for the establishment of the next Youth Action Plan, so this aligns with this direction - Only seeking budget for one year and will seek holistic budget for the delivery of the Youth Action Plan (YAP) in 2025/26.

# Data for strategic planning and decision making

**Id Number:** 36348

**Department:** City Development

**Key Direction:** Innovation and Business Development

Financial Year: 2025

Executive Summary:	This budget bid aims to fund the subscription to Spendmapp, an online analytics applications that provide Council and our community access to data for evidence based decision making.
Scope:	Spendmapp is an online analytics application that allows Council to view and analyse anonymised and aggregated bank transaction data by location, time, expenditure type and expenditure category. The information provided in Spendmapp, is representative of all cardholder transactions and non-card transactions, including cash, for the Salisbury LGA and subdivided by suburbs. Annual subscription: \$29,000
Justification:	Examples of use of Spendmapp data:
	<ul> <li>Help Council support businesses manage disruption and improve their own planning</li> <li>Measure actual retail catchments to inform zoning changes</li> <li>Provide supporting evidence in grant applications</li> <li>Undertake event impact assessment and funding acquittal</li> <li>Analyse trends and the impacts of events in the night time economy</li> <li>Inform policies to reclaim escape spending</li> <li>Improve the targeting of visitor marketing strategies</li> <li>Analyse the true impact of business development incentives</li> <li>Generate regular economic health reports</li> <li>Deliver custom area data for our activity centres</li> <li>Analyse the before and after of Council initiatives</li> </ul>

# **Community Experience Strategy**

**Id Number:** 36362

**Department: Business Excellence** 

**Key Direction:** Innovation and Business Development

**Financial Year:** 2025

ag cu st	o enable the development of a Community Experience Strategy, external gencies will need to be engaged to conduct customer and staff research and ustomer mapping activities, as well as assist with the development of a crategy.  his funding is to develop the strategy only with any actions required subject
	o a future budget bid.
	ne of the City of Salisbury's success factors is exceptional community xperience.
w fu co	alesforce is a new Customer Relationship Management (CRM) system that was implemented last year to provide a streamlined enquiry management unction and focus on improved communication, workflow and efficiencies in original provides of the CRM through Project Connect aims to provide the bundations for a higher level of service through integration with organisational Business Systems. Project Connect will explore further echniques to help us capture data for the benefit of our community, usinesses and visitors.  Strategy is needed to support the transition of the organisation to be more formunity centric.  The City of Salisbury currently has an outdated community experience charter that needs to be updated/replaced and there is currently no strategy that utilines the Council's priorities in this area, objectives and success measures. In 2024-2025, research and mapping activities need to be undertaken to mable the development of a Community Experience Strategy for the City of alisbury. This will include reviewing existing data such as the Community experience team.  Is proposed to engage a research consultant to further delve into our

available data and conduct focus groups with staff and the community to understand strengths and weaknesses across the organisation.

A further engagement to undertake a customer mapping piece is also proposed so the Council has the necessary information and data available to prepare a Community Experience strategy.

The development of the strategy will occur in 2025-2026 and so budget is requested to engage an external consultant to assist in the development of this piece.

The Community Experience Division will undertake other pieces of work as part of the strategy development such as engagement with staff and community, drafting and design of the Strategy and implementation.

The Division will also update the Charter once the strategy is developed.

# Cleaning & Sanitary Services for Additional Facilities

Id Number: 36508

**Department:** City Infrastructure

**Key Direction:** A welcoming and liveable City

Financial Year: 2025

Executive Summary:	New allocation for cleaning and sanitary services for Council facilities which are now being coordinated and managed by Council in lieu of a third party.
Scope:	With Council now undertaking the cleaning and sanitary services for three Council owned facilities which were previously managed by a third party, a new funding allocation for these services at the following locations;
	• St Kilda Community Hall, St Kilda - Est. \$7,900 per annum based upon cleaning twice a week and sanitary services
	Bagsters Road Community Centre, Salisbury North - Est. \$33,000 per annum based upon cleaning five days per week and sanitary services
	• Salisbury East Neighbourhood Centre, Salisbury East - Est. \$18,900 per annum based upon cleaning three days per week and sanitary services
	Total - Est. \$59,800 per annum ongoing
Justification:	Due to the change in the third party arrangements associated with Council owned facilities, a new allocation for ongoing cleaning and sanitary services is now required for the affected facilities. To note, the budget allocation requested is indicative on a programmed level of service, should there be a change of service in regards to reactive needs or required frequency, this will be reported and requested separately.

#### **Integrated Transport Plan**

**Id Number:** 36518

**Department:** City Infrastructure

**Key Direction:** A welcoming and liveable City

Financial Year: 2025

#### **Executive Summary:**

To fund the review and update of the Integrated Transport Plan which gives consideration of modes of transport, the completion of a Transportation Road Safety Study to identify high risk roads and updating of the School Transport Framework. This traffic plan will be developed closely with the City Growth transportation planning. Implementation does not form part of this bid and will be subject to future funding.

#### Scope:

In order to plan and action transport improvement opportunities, it is integral that the 2017 Integrated Transport Plan is reviewed and updated. As part of this, consideration will be given to the various modes of transport, completion of a Transport Road Safety Study and the review and updating of the School Transport Framework. A particular priority will be to understand key East /West connectivity links and connections to the key arterial road network. This transport planning study will be coordinated with the planning work which is to occur as part of the City Growth agenda and is a separate bid.

As part of developing the Integrated Transport Plan, consultation will occur with all identifiable key road safety stakeholders such as the Department for Infrastructure and Transport (DIT) and the South Australia Police (SAPOL). Data collection and analysis will occur also, whilst giving consideration to other closely linked planning activities such as City Growth.

In addressing the road safety initiatives requested by Council, this planning work will provide a wide-ranging number of local road safety improvement options and associated costing including, but not limited to, speed detection advisory signs, traffic control devices, signage and other road related infrastructure. This will when be presented as a priority of works program to Council for consideration of future funding with implementation not forming part of this bid.

In order to complete the required work to deliver the Integrated Transport Plan and road safety review, this bid includes an allowance for consultancy and internal engineering and design time.

#### Justification:

The 2017 Integrated Transport Plan requires reviewing and updating to assist with the management and planning of the various modes of transport within the City.

The School Transport Framework, as reported August 2020, Resolution 0659/2020, also requires updating, giving consideration of traffic and modes of transport associated with the multiple schools which reside within the City.

This bid will also include investigative works in accordance with Resolution 0566/2023, December 2023, where Council based upon the increase in numbers of lives lost and serious road injuries which have occurred within the State, sought that all current road safety strategies, programs, initiatives and policies are reviewed, to inform a report and road safety options presented to Council in August 2024. This will be presented as a Traffic Safety Plan.

The management and planning of transport routes and traffic within the City is imperative to facilitate economic development of the Northern region in an effort to reduce the number of accidents and / or incidents, reduce excessive speed, improve traffic flow and safety for all.

# Salisbury Hub After Dark

**Id Number:** 36690

**Department:** Community Development **Key Direction:** A welcoming and liveable City

Financial Year: 2025

	2023
Executive Summary:	On-going funding to deliver the Salisbury Hub After Dark service, which extends opening hours at the Salisbury Community Hub on Monday/Tuesday/Wednesdays until 8.30pm with only Security present on site.
Scope:	Since August 2023, the City of Salisbury have run the Salisbury Hub After Dark pilot program, exploring new and innovative ways to activate community spaces and to test our community's appetite for an unstaffed service.
	The evaluation of the pilot and an opportunity to expand on this pilot and transition to an ongoing operational model was presented to Council in February. The Administration proposed:  • the Salisbury Hub After Dark be an on-going service offered to our
	community;  • the service be extended to 3 nights a week (excluding Public Holidays) from 5.30 to 8.30pm only; and  • the service be offered on Monday, Tuesday and Wednesday nights but with
	the ability for the Administration to change nights based on community demand if required.
	In order to increase the activation of the pilot from 1 to 3 nights as per proposal, the total cost for Security is an additional \$12,000 per annum. This includes;
	<ul> <li>one additional Security Guard on Monday and Tuesday evenings; and</li> <li>two on Wednesday evenings.</li> </ul>
	2 Security Guards present is considered a minimum requirement to allow for appropriate coverage at the entrance as well as the building.
	The program will be reviewed following the conclusion of year 2.
Justification:	Council has established a successful service that is both needed and wanted by the community. During its trial period, the pilot demonstrated that for a relatively small investment, the service is having a positive impact in the lives

OPN001265 - P a g e | 1 Date Produced: 05-Mar-2024 of many our community, particularly with their work and study goals. The evaluation also concluded that there was strong demand for this service on additional evenings of the week.

The success of this pilot has shown that there is now an opportunity to expand on this pilot and transition to an ongoing operational model, and in February 2024, Council considered to an ongoing funding this service and as part of the 2024/25 budget process.

# **Representation Review**

**Id Number:** 36696

**Department:** Chief Executive Office

**Key Direction:** Innovation and Business Development

Financial Year: 2025

Executive Summary:	Funds required to engage external resourcing required to conduct the statutory representation review.
Scope:	Engagement of appropriately qualified external resources to conduct the statutory Representation Review in 2024/25.
Justification:	The Representation Review is a statutory review pursuant to sections 12, 16 and 33 of the Local Government Act 1999. This review considers the composition of the Council and the advantages and disadvantages of various representation options. It's a mandated statutory review to be undertaken by a qualified person, hence non-discretionary. Elected Members have been verbally briefed on this exercise.

# **Footpath Maintenance**

**Id Number:** 36743

**Department:** City Infrastructure

**Key Direction:** A welcoming and liveable City

Financial Year: 2025

Executive Summary:	An increase in footpath maintenance funding is required to address known defects and sustain the required level of service for the footpath network, following completion of a footpath audit in 2023.
Scope:	The audit information presented to Council February 2024 in alignment with agreed level of service determined an increase in maintenance is required to \$1.5M per annum.
Justification:	In accordance with Resolution 0603/2024, February 2024; Item GB1, an increase to footpath maintenance budget to \$1.5M was approved;  5. Approves in principle a maintenance budget of \$1.5m for the 2024/25 budget with \$200k for Bituminous Footpath Renewal and requests further information on the maintenance, noting that appropriate rise and fall should be incorporated into subsequent financial years.

**Executive Summary:** 

# Environmental Health Officer (1.0 FTE Level 5)

An additional Environmental Health Officer (EHO) is sought to meet obligations

under the Food Act 2001 and Local Nuisance and Litter Control Act 2016,

Id Number: 36770

**Department:** City Development

**Key Direction:** A welcoming and liveable City

Financial Year: 2025

	and the rood her boar and boar randance and breef control her boar
	maintain service standards and meet community expectations.
Scope:	The City of Salisbury is responsible for the administration of public and
	environmental health, litter control and local nuisances under a range of
	legislation. Increased obligations under the Food Act 2001 and associated
	standards, as well as the increase in obligations under the Local Nuisance and
	Litter Control Act 2016 are impacting service delivery standards and increasing
	risks to the community. The ability to conduct food business inspections in
	accordance with the Food Business Risk Classification is critical to reduce the
	risk of a foodborne outbreak in the city.
Justification:	A comprehensive review of the Environmental Health Team (formerly the
	Public and Environmental Health Services Division) was undertaken in 2016.
	The 2016 review acknowledged the upcoming introduction of the Local
	Nuisance and Litter Control Act 2016 (LNLC) would create obligations on local
	government to manage and enforce local nuisances, however the projected
	number of complaints was low (eg under 50 per annum according to the EPA).
	The LNLC Act came into operation in 2017/18 and since that time complaints
	have risen with approximately 1,600-1,700 per annum (with about 600 of the
	more complex complaints managed by the Environmental Health Team).
	Upcoming amendments to the LNLC Act are likely to see an increase in the
	number of complaints and complexity of investigations.
	In 2022, amendments under the Food Act 2001 introduced the requirement to
	monitor and enforce allergen controls for businesses declaring allergen free
	products and in December 2023 a new Food Standards Code, Food Standard
	3.2.2A – Food Safety Management Tools was introduced. These changes have
	significant implications for 531 out of the 869 (61%) registered food business
	(eg restaurants, cafes, supermarkets, takeaways, bakeries, pubs, service
	stations, delis, canteens, sporting clubs, and mobile food vendors) in Salisbury.
	The transition process is resource intensive and requires significant support
	from Environmental Health Officers to individual businesses. The South

Australian Food Business Risk Classification (released in 2022) also sets out guidelines for the frequency of Council undertaking food inspections based on risk (minimum of every 6 months for high risk businesses). With the increased demand on services, there is a need for an additional team member to ensure Council meets its legislative obligations and community expectations.

A comparison against other councils demonstrates that Salisbury EHOs carry a higher workload than staff in other councils. Based on ratios of food premises and population per officer, Salisbury EHOs are servicing significantly more premises and residents than the comparative councils.

## **IT Asset Renewal**

**Id Number:** 34609

**Department:** Business Excellence

**Key Direction:** Innovation and Business Development

Financial Year: 2025

Executive Summary:	Programmed asset refresh of end user equipment and network infrastructure across all City of Salisbury operating locations, including Libraries and Community Centres
Scope:	This project's scope is to replace IT hardware that has reached the end of its useful life and is no longer supported by the manufacturer.
	In scope equipment is shown below including the recommended asset life  • Laptops - 3 years (Elected Members 4 year life as per term + extended warranty)  • Desktop Computers - 4 years
	<ul> <li>Monitors - 5 years</li> <li>Docks - 5 years</li> <li>Keyboards and Mice - 2 years</li> </ul>
	<ul> <li>Reyboards and Mice - 2 years</li> <li>Headsets - 2 years</li> <li>Tablets - 3 years</li> <li>Mobile Phones - 3 years</li> </ul>
	<ul> <li>Network Switches - 5 years (including annual managed service expense)</li> <li>Server Infrastructure - 5 years</li> <li>Network Infrastructure - 5 to 8 years</li> </ul>
	<ul> <li>Library Infrastructure - 5 years to 10 years</li> <li>Library Hardware - 5 years</li> </ul>
Justification:	Technology and Digital Solutions play a crucial role in overseeing the management of organizational technology assets. Maintaining IT equipment is vital to ensuring optimal levels of productivity and efficiency, enabling employees to provide services that align with community expectations.
	The key objectives of IT asset management encompass:
	1. Enforcing compliance with corporate cybersecurity policies and regulatory requirements by ensuring the currency and appropriateness of all hardware and software.

ITN001209 - P a g e | 1 Date Produced: 05-Mar-2024

- 2. Enhancing productivity through the strategic deployment of technology to meet user and business needs.
- 3. Sustaining a fleet of assets that maximizes value to employees, extends useful life, mitigates risks, and reduces support costs.

A comprehensive review of IT assets by Technology and Digital Solutions has been conducted to comprehend and define their useful life. This effort ensures the reliability and satisfactory performance of equipment. The results of this review facilitate the future forecasting of capital expenditure.

The anticipated costs encompass the entire lifecycle of equipment, including procurement, deployment, testing, recovery, and disposal, along with the secure deletion of all City of Salisbury data. The residual value of assets at the end of their useful life is minimal, providing limited opportunities for income generation.

For Network switches, the forecast incorporates an annual managed service for patch maintenance and monitoring.

A desktop audit undertaken by Technology & Digital Solutions has reviewed the desktop assets (computers) slated for replacement in the financial year 2024/25. Based on this assessment, the costs associated with desktop asset replacement have been more evenly distributed over the span of four years.

However, due to components of the library RFID Technology reaching end of life and the requirement to replace the Self-Serve kiosks and public printing hardware at multiple libraries the savings from the desktop computer asset replacement program have not been realised in 2024/25.

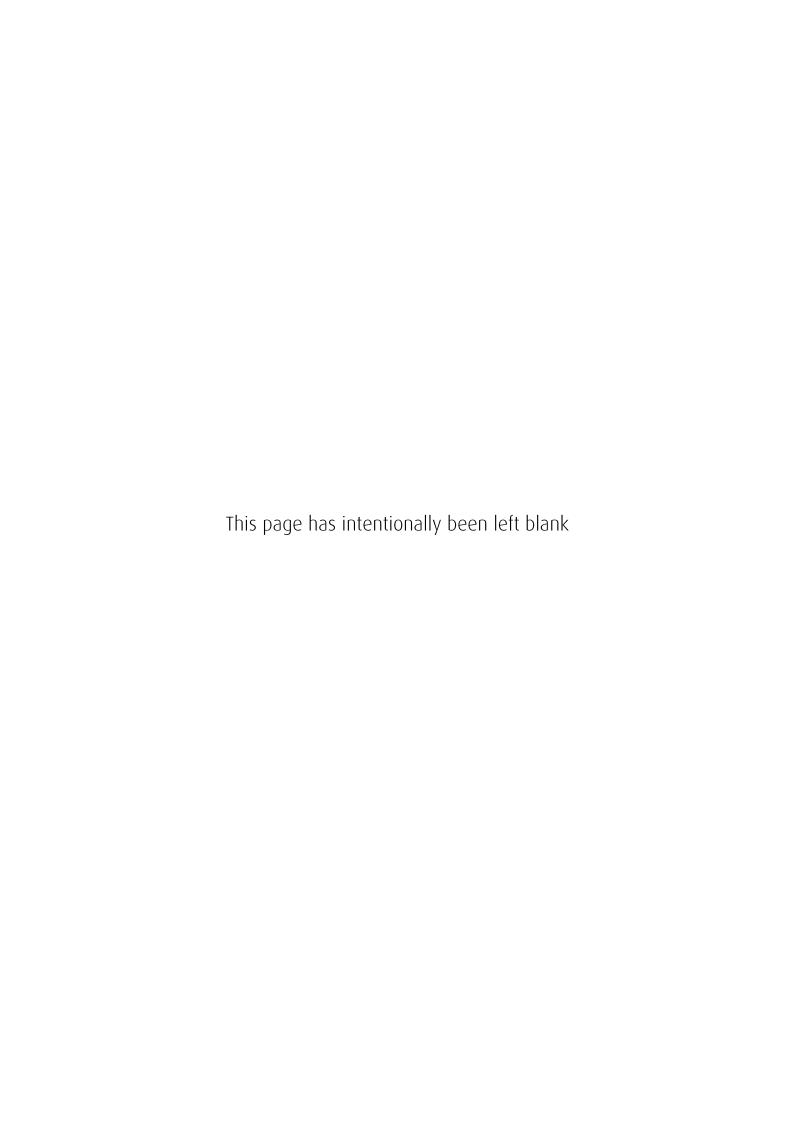

Peak expenditure for the 2024/25 and 2025/26 has also been impacted by the need to replace critical servers and network infrastructure across multiple sites.

# **Expansion of Centrally Managed Wi-Fi 2024/25**

Id Number: 36106

**Department:** Business Excellence

**Key Direction:** Innovation and Business Development

Financial Year: 2025

**Executive Summary:** To facilitate a roll-out of corporate grade Wi-Fi at community centres to align with the solution provided in the Salisbury Community Hub. This was originally approved in 2022/23 budget bid but due to significant increases in costs additional funding is sought. At the completion of the implementation of the new wide area network Scope: contract which will provide the underlying link infrastructure between sites links to each site will have had an increase in speed and additional security infrastructure implemented. This base infrastructure work will enable the expansion of the system used to manage Wi-Fi and the Salisbury Community Hub (SCH) to other locations. This will be limited to sites that have existing links provided and funded by the City of Salisbury and the work will take place over a two year period. The priority of facilities to be upgraded will be determined in conjunction with the broader organisation but each year will include some community centres libraries and smaller locations. No new locations will be covered by this request as this will become part of any new build and implementation costs (e.g. Burton Community Hub and Salisbury Recreation Precinct). The Wi-Fi provided will be able to be customised to suit requirements while ensuring that central management can occur with these services being added to the managed service contract as they are established. The scope of this project will cover both licenses installation of hardware and configuration of hardware and systems. The only additional ongoing costs will be the addition of this equipment on to the managed service contract for network support. It will have no additional ongoing licensing costs as it will utilise the excess capacity from the Salisbury Community Hub. Justification: Currently most community centres (and some other locations) do not have a

> ITN001230 - Page | 1 Date Produced: 05-Mar-2024

Wi-Fi service for either staff or members of the public to utilise.

In some locations centre staff have procured their own hardware to provide a public Wi-Fi service and also to run programs that require internet connectivity.

This has resulted in less than ideal experiences during some scheduled programs and a quality of service that is quite poor. This approach also sees many support jobs logged through to Technology & Digital Solutions which we are unable to help with due to the confusion of ownership of hardware and systems.

The implementation of better links and security infrastructure that is underway as part of the new WAN contract work will provide a stable back bone to enable the expansion of the current Wi-Fi system to these sites.

Wi-Fi that will be provisioned will be configured to suit the user requirements and will not be limited to the same Wi-Fi network names as exist in the SCH. This new Wi-Fi will be able to be managed centrally by TD&S as well as being monitored as part of the managed service that covers the system in place for the SCH.

Delays in the establishment of the new wide area network have also delayed the start of this work. Consequently, costs have significantly increased for hardware, design and implementation services. The existing funds from the 2022/23 (\$65,000) and 2023/24 (\$65,000) budgets will be used first and will cover 4 of the 9 sites. The additional funding sought in this bid will enable the remaining sites to be updated.

# Replacement of Elected Members Microphones in Little Para Conference Room

Id Number: 36107

**Department:** Business Excellence

**Key Direction:** D4. CP2030 Achieving Excellence

Financial Year: 2025

Executive Summary:	Replace the Microphones used by the Elected Members during Council Meetings with a robust and flexible solution.
Scope:	The existing microphones have reached the end of their operational life and are exhibiting signs of failure. Due to the age of the current system, existing hardware is unable to be replaced as it is no longer available. Therefore, the project scope involves the procurement and implementation of a new microphone system to ensure optimal functionality and performance.
Justification:	The justification for adopting a new microphone solution is grounded in several key features that collectively enhance the efficiency and effectiveness of meetings:
	1. Versatile Integration of Features: The proposed solution seamlessly combines a microphone, loudspeaker, and user controls into an integrated wireless unit. This comprehensive integration caters to the diverse needs of various meeting spaces.
	2. Wireless Convenience and Easy Setup: The wireless functionality eliminates the need for routing cables, facilitating quick and hassle-free setup in any meeting room. This not only enhances flexibility but also reduces installation time and costs.
	3. Extended Battery Life and Smart Rechargeable Battery: The inclusion of a smart rechargeable battery with an extended run time of over 11 hours ensures uninterrupted meetings without concerns about battery depletion. This feature is crucial for sustained performance during lengthy meetings.
	4. Efficient Wireless Charging Station: The wireless charging station with rechargeable batteries for base units adds convenience, ensuring the system is always ready for use. This feature promotes reliability and minimizes downtime associated with charging.

#### 5. Intuitive Touchscreen Interface:

A user-friendly touchscreen interface, with a colour display, allows for easy control of various functions such as voting, meeting information, and individual preferences. This enhances user engagement and simplifies system operation.

#### 6. Built-In Loudspeaker with Microphone Activation:

The proposed solution includes a built-in loudspeaker that remains active when the microphone is in use. This ensures clear and audible communication, contributing to an improved audio experience during meetings.

#### 7. Flexible Voting Options:

The system supports both secret and open voting, offering flexibility based on the nature of the meeting. The capability to capture and display voting results adds an additional layer of functionality, adapting to a variety of meeting scenarios.

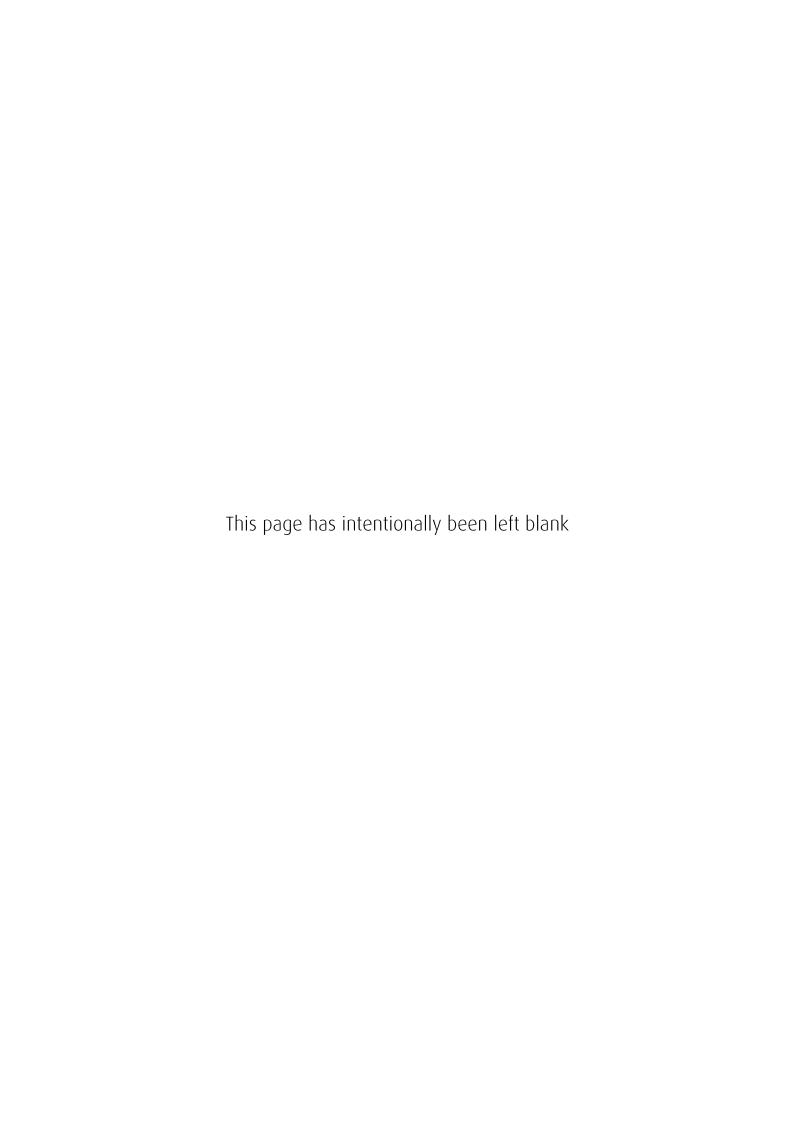

In summary, the new microphone solution presents a set of features that collectively address the limitations of the existing system. Its wireless convenience, extended battery life, intuitive controls, and versatile functionality make it a suitable choice for optimizing meeting spaces and fostering a seamless and productive collaborative environment.

2025

sites.

**Executive Summary:** To leverage existing data to reveal a clear picture of community issues, realtime incidents, correlations and trends. Future-proof our city's strategic planning by breaking down data silos and implementing collaborative, timely information-sharing workflows for data-driven decision-making. To utilise all the benefits of ArcGIS Business Analyst widget, Story Maps, Arc Scope: GIS Experience Builder, Slider widgets for comparing large raster data sets and targeted external portals for Environmental Management, Strategic Land Review and Recreation/Community Activities. Share spatial and business analytics, publish demographic and consumer insight dashboards, apply location intelligence to our decision-making and develop repeatable workflows that link common tasks together with ArcGIS Business Analyst Enterprise. The organisation can take a location-based approach using geospatial data to discover and share market insights that help key stakeholders and executives make better, data-driven decisions. Justification: The acquisition of ArcGIS Business Analyst is paramount to advancing the Strategic Development Projects team's capabilities in conducting precise and data-driven feasibility investigations. The software will enable the integration of spatial analysis into the decision-making processes. This will enable deeper insights into market demographics, optimise site selection, and model various scenarios, ultimately enhancing the accuracy and strategic value of feasibility assessment of future development opportunities. ArcGIS Business Analyst's features align perfectly with the SDP requirements, enabling a streamlined approach to analysing geographic and business data. The software will improve the ability to make informed decisions based on a

comprehensive understanding of the spatial aspects of potential development
